Loddon

Equestrian Ltd.

Loddon
Equestrian Ltd.

Introduction

Loddon Equestrian are manufacturers of 'World Class' internal stables. Established in 1960, we are synonymous with luxury heritage and authentic craftsmanship. Our purpose built manufacturing facility enables all components to be fabricated in-house and many of our highly skilled workforce have over 25 years of manufacturing experience with us.

In November 2015, the De Swart Group acquired Loddon Equestrian Ltd. Their company Molenkoning have been at the forefront of the design and manufacture of horsewalkers for over 20 years. This excellent business alliance enables us to offer a complete range of equestrian products.

We also offer an in-house design service, creating custom made stables to fit all spaces. Trained consultants with extensive industry knowledge and in-depth equestrian experience are on hand to share their design expertise as well as offering a free on-site survey and measuring service.

Innovation is key and we are looking forward to adding ranges to our portfolio, without compromising our core values and our strong British identity for which we are recognised.

Awarded the Royal Warrant by Her Majesty Queen Elizabeth II, we are proud to boast an enviable list of customers, including The Hong Kong Jockey Club, The New York Police Department, The Dubai Arabian Stud and The Singapore Racing Association to name but a few.

We use only the highest quality materials, Grade A Hardwood, as well as 100% sustainable materials including Recycled Polyethylene (multiple colour choices) and Bamboo. All steelwork has, as standard, a hot dip galvanised finish that meets the BS EN ISO 1461 standards.

Along with our core values of Safety, Style, Functionality and Endurance comes our passion and our commitment to continue to offer a product and service that is second to none. Coupled with our global experience of over 50 years, this makes Loddon your equestrian manufacturer of choice.

Wellington

Our most stylish stable design which incorporates a high stable front with curved features. This range is further enhanced with 127mm (5") posts finished with impressive finials or caps.

Optional features:

Galvanised or powder coated finish (choice of colours)
Hinged or sliding doors

Black powder coated over galvanised steelwork with hardwood infills

Galvanised steelwork with hardwood infills

Gun metal grey powder coating over galvanised steelwork with bamboo infills

“Some of the Loddon designs are truly spectacular and if you are really looking for the ‘wow factor’, then I suggest you instruct them to turn your ideas into reality now.”

Jackie Cornwell The Old Rectory Stud, Northants

Nelson

All the latest features with a classic Victorian look, dual horizontal board feature and brass capped 127mm (5") entrance posts. Round tubing and an attractive drop down design at the front.

Optional features:
Galvanised or powder coated finish (choice of colours)

"I chose Loddon stables because of the long standing reputation for making quality stables. When designing my yard it was important to have nice looking stables, that were strong and safe to house my horses. Loddon met all my requirements."

Robert Whitaker, Show Jumper

Powder coated green over galvanised steelwork with grey recycled polyethylene infills

Green powder coated over galvanised steelwork, hardwood infills and custom made doors

Gold powder coated over galvanised steelwork and beige recycled polyethylene infills

York

Authentic design with traditional details including dual horizontal board feature, 102mm (4") round posts throughout, complete with brass finials and door hoops.

Optional features:
Galvanised or powder coated finish (choice of colours)
Hinged or sliding doors

Black powder coated over galvanised steelwork with hardwood infills
Off set sliding doors

Green powder coated over galvanised steelwork and hardwood infills

Galvanised steelwork with brown recycled polyethylene infills

"I cannot speak more highly of Loddon and wish to thank them for 25 years of maintenance free stabling."

Michael Amore, General Manager Royal County of Berkshire Polo Club

Supreme

A “touch of class”, an understated but elegant design. Round 102mm (4”) entrance posts and door hoop feature add character and style.

Optional features:
Galvanised or powder coated finish (choice of colours)
Hinged or sliding doors

“Having installed Loddon stables in my stable complex 20 years’ ago and have been delighted with them, I obviously returned to them for a design for a new project. I am sure they will be as solid and attractive as the others. Loddon Stables are made to last.”

Lady Cobham, Wiltshire

Galvanised steelwork with hardwood infills

Gold powder coated over galvanised steelwork with beige recycled polyethylene infill

Green powder coated over galvanised steelwork with brown recycled polyethylene infills

Windsor

A low fronted design of our standard stables.
An affordable option without compromising
on style complete with 102mm (4") round
brass capped door posts.

Optional features:

Galvanised or powder coated finish (choice of colours)
